Description

- Permanently solidifies to "lock" in absorbed hydrocarbon based liquids; liquids won't leak back out or revert to a liquid state when handled or placed under pressure
- Locking in the oil-based liquid helps reduce odours normally associated with hydrocarbon spills
- Environmentally friendly product absorbs oils and oil-based liquids, including fuels, solvents and paints whilst not absorbing any water
- Forms a solid mass without expanding for easier, less expensive recovery and cleanup
- Non-toxic product typically absorbs five times its weight; you'll use less material and cut your disposal costs
